

2013 **WATER AND SANITATION** **TRAINING COURSE**

“CAS-TWAS Centre of Excellence for Water and Environment”

(CAS-TWAS CEWE) is established in the Research Centre for Eco-Environmental Sciences (RCEES), Chinese Academy Sciences (CAS). It accepts instructions of CAS and the World Academy of Sciences for the Advancement of Science in Developing Countries (TWAS). The goal of CEWE is to culture the professionals in the water and environmental fields for developing world through various training, education and joint research programs. The CEWE will initiate a training program for water and wastewater managers from the developing countries. This training program consists of lectures, technical tour, workshop and other related events. A network for the water professionals and researchers in developing countries will be reinforced through our continuing efforts.

All expenses for approved applicants, including airfare, accommodation, registration and meals, will be covered by CAS-TWAS CEWE.

Module:

The training program will include the following 4 modules. The purpose of this training course is to share China's experiences in coping with the water sanitation challenges with the trainees. How to enhance the cooperation between China and other developing countries will also be discussed during the period.

Water environment protection: regulations and practice

Wastewater treatment: technologies and processes

Water supply: pollutants removal and management

Water source management: conservation and remediation
