

# TWAS PORTFOLIO OF HOST SUPERVISORS

for the

**“TWAS-Sida PhD Scholarship Programme for Climate Research  
for students from Least Developed Countries (LDCs)”**

“

*The vision of this Climate PhD Scholarship Programme is to go beyond just forming new graduates, aiming to equip candidates with a range of skills to be able to take action in the context of the challenges posed by climatic changes.*

*TWAS has selected potential host supervisors, which are listed below in the “TWAS Portfolio of Host Supervisors”. These host supervisors are scientists with appropriate expertise in areas relevant to climate research and climate change.*

*You must choose your host supervisor from the “TWAS Portfolio of Host Supervisors”, with the exception of the “Sandwich Mechanism”, where you can also propose a host supervisor yourself, as explained in the **Guidelines for Applicants**.*

”

**Please note:** the application on the online platform will collect all the information necessary for the selections; therefore, applicants are not required to contact host supervisors and obtain their prior acceptance. After the deadline for submission of applications, the host supervisors will make selections based on applicants' background, transcripts, and expression of interest.
